

Is there something in the water?

Devon is simply full of winners. This was particularly brought to our attention when sports personalities from the area, such as Sharon Davis and Tom Daily captivated the world whilst competing for their numerous medals as well as representing Great Britain at the Olympics. Now Teighmouth based band Muse are also among the winners after receiving a Grammy Award for the Best Rock Album. With so much talent coming out of this county, many people have found themselves wondering if there's something special in the water down south. After all, Devon has been home to many notable names over the years, including Sir Francis Drake, Agatha Christie and Chris Martin. But it's not just Devonshire people that have put this county firmly on the map- great things have taken place in Devon too. The Mayflower set sail to the New World from Plymouth and how could Devonshire Cream Teas not receive mention as one of the tastiest of afternoon indulgences? But now one organisation is ensuring that Devon is being recognised for something new- organic mattresses.

The Naturalmat Company is based in Topsham, Devon. The business was started by directors Mark Tremlett and Peter Tindall who set out to develop the perfect sleeping environment for babies and children, using only natural materials within their mattresses.

Since launching their first organic baby mattress Naturalmat has gained the interest of customers all over the world, as well as the attention of celebrity clients such as Halle Berry, Billie Piper and Gwyneth Paltrow. A-listers simply love Naturalmat's organic mattresses and cozy baby blankets.

The company has recently launched a range of adult natural mattresses. One of the most luxurious choices within the Naturalmat adult mattress line is the **Mohair Mattress**. This is the perfect option for someone who enjoys a firm mattress. It is made up of two layers of organic coir (coconut fibre) which increases the overall level of support and the organic latex core adds flexibility. The mohair tufting creates a lustrous top layer and organic lambswool protects the mattress against dust mites and bed bugs- a subject of great concern at the moment.

So if the **Naturalmat Mohair Mattress** has sparked your interest why not go to the Naturalmat website and have look at the many other eco items available from this incredibly unique company. Naturalmat products can be bought from **www.naturalmat.co.uk**.

About The Natural Mat Company:

The Natural Mat Company was founded in 2000 in Topsham in Devon, by Mark Tremlett and Peter Tindall, who as keen sailors both became frustrated with the poor quality of synthetic mattresses found on boats.

Mark and Peter decided to look for an alternative and found natural fibres to be a more superior substitute for boating. With their knowledge and expertise they quickly developed a business making mattresses for yachts and motor boats. With the arrival of Mark's first child, they quickly identified a need for a natural offering for babies.

With a mission to develop the perfect natural sleeping environment for babies and children, Mark and Peter set to work to create a range of pure natural fibre mattresses. After nine months, they were proud to launch the first range of natural baby mattresses.

The handmade range includes organic coir, natural latex and mohair mattresses from cribs through to children's beds. Each mattress provides parents with the peace of mind that babies will have a safe and restful night sleep on the highest quality natural fibres available today.

Natural Mat manufactures and distributes mattresses around the world from its base in Topsham, Devon.

About the Naturalmat Mohair Mattress:

The Naturalmat Mohair Adult Mattress offers firm support. The mattress consists of two layers of organic coir which provides the body with complete support. The organic latex core provides spring and enables the mattress to be firm yet flexible. The mohair tufting adds a lustrous top layer and the organic lambswool repels pests such as dust mites and bed bugs. This mattress complies with all standards and is completely chemical free.
